

SPI Master UVM Final Report

This is the UVM implementation requested for the grading-report layout.

The environment includes structural UVM bonus hooks: run_test in tb_top, spi_env extends uvm_env and gets APB/SPI v
The RAL bonus hooks are implemented: spi_reg_block extends uvm_reg_block and declares CTRL, STATUS, TX_DATA, RX_DAT
Bug-detection strategy combines directed checks, randomized stress, scoreboard mismatches, UVM errors, and SVA asse
