

SPI Master UVM Test Plan

UVM architecture: apb_agent, spi_agent, spi_env, spi_scoreboard, spi_coverage, spi_reg_block, adapter, virtual sequ

Regression tests: sanity, reg_access, mode_coverage, width_coverage, fifo_stress, interrupt, clk_div_corner, loopba

Coverage targets: APB registers and reserved offsets, mode x order x width, div corners, FIFO levels, interrupt sta

Assertions: APB protocol, zero wait state, IRQ equation, SS equation, overflow events, TX empty, reserved read zero
